

The Envize™ for Relativity Difference

Envision Better, Envision Envize™

Envize provides industry-leading minimization of time and effort required for stable document classification, and provides review leaders with powerful workflow flexibility. Whether your preference is a more traditional “Train/Review/Produce” model, Continuous Active Learning™, or any number of possible variations, Envize supports that preference.

How does Envize Compare to Our Competitors?

- ✓ It was built specifically for Relativity with automated features that make your review faster.
- ✓ It provides just in time auto-batching and SMART active learning load balancing.
- ✓ It allows for customized active learning workflows on every project.
- ✓ The dashboard lets you focus on what matters ... “How many documents have you/are you finding?”
- ✓ It was unique capabilities for measuring stability/selecting samples and more.
- ✓ The underlying technology is more forgiving of non-relevant text.
- ✓ It was built from the ground up for document review.

Let’s change the business of legal together.
