# Everlaw for Corporations
## eDiscovery Made Easy

Modern communications and the proliferation of mobile devices have completely changed the game of discovery. Data sizes and file types continue to increase; all while the demands of litigation, internal audits, and Data Subject Access Request (DSAR) responses complicate workflows and increase the cost of document review.

Corporate teams face similar challenges across all types of investigations:

✓ Creating order from the chaos of massive document troves

✓ Communicating effectively internally and externally withoutside counsel

✓ Efficiently converting their findings into a cohesive and compelling narrative

This is where Legility experts paired with sophisticated, user-friendly technology can create sanity and order. Everlaw is a cloud-based platform built for corporations that enable teams to collaboratively discover information, reveal its underlying structure, and act on those insights. Everlaw combines speed, security, and ease-of-use into a **unified, comprehensive SaaS platform** that unlocks the collaborative power of legal teams and enables them to investigate issues thoroughly, uncover truth quickly, and present their findings clearly. Everlaw's strengths lie in its user-friendly interface, simple pricing model, and extensive feature capabilities.

Corporations of all sizes rely on Legility and Everlaw to quickly discover relevant information, reveal the hidden details of documents, and collaborate to craft cohesive narratives.

**A Trusted Partner**

Legility is one of the largest global providers of Everlaw, and the go-to partner for clients looking to leverage the benefits of the Everlaw eDiscovery platform. We support Everlaw across our global footprint for both eDiscovery managed services and transactional discovery projects. As one of the largest and longest-tenured global providers of Everlaw, Legility's eDiscovery experts have been delivering excellence using Everlaw technology since 2016.

## Discover: Ingest, organize, search, and review massive troves of data

- A directly-accessible interface that allows reviewers to **upload data directly** into the platform, ultimately reducing delays, complexity, and additional costs associated with relying on a third party for processing.

- The drag-and drop interface of **visual search**, featuring color-coded rules of logic, makes it easy to build highly sophisticated searches, even for beginners.

- **Native document support** for spreadsheets, modern chat data, and AV media provides direct visibility into files without the need for costly third-party plugins.

## Reveal: Expose the hidden data of documents at scale

- Support for **modern data formats** (e.g. Slack) lets reviewers maintain continuity by viewing these docs in a recognizable format.

- **Predictive coding** enables reviewers to use their standard workflow—assigning ratings, codes, and attributes to reviewed documents—to teach the system how to find more relevant documents on their behalf.

- **Data visualization** tools generate interactive, customizable visualizations from any set of documents. This makes it possible to explore documents at a glance without the need to review individual documents or conduct a predetermined search.

## Act: Collaboratively craft narratives and efficiently manage litigation

- Everlaw enables **secure sharing** directly in the platform to promote seamless collaboration. Everlaw is externally audited to ensure compliance with international security and privacy standards, including Soc 2 Type II, HIPAA, and GDPR.

- **Narrative-building** tools ensure collaborative alignment of investigative teams, improve workflow, reduce risk, and save time by organizing key documents into a compelling narrative.

- **Case analytics** let administrators evaluate reviewer accuracy, pace, and consistency. This helps keep teams on pace to meet deadlines, course-correct if issues arise during projects, and create more transparency into reviewer accuracy and project costs.

- Granular **organization administration** allows control over the actions of every person with access to the Everlaw platform, enabling highly efficient end-to-end management of projects and ensuring that roles are properly aligned to responsibilities across even the most complex cases in the largest organizations.

**Let's change the business of legal together.**
