

Forensics

Your Evidence is in Good Hands.

Legility offers multiple proven, scalable and integrated solutions for defensibly and accurately collecting your data.

From remote and cloud options to traditional on-site collections, our certified digital forensics expert will ensure that all data sources are documented, and all collected data and metadata are verified.

In addition to tracking chain of custody records, we maintain detailed reports on every action taken, ensuring the evidence findings are validated every step of the way. We are also available to provide oral testimony in court or submit statements through prepared affidavits.

Forensic Analysis

We trace digital breadcrumbs to help you investigate anomalies and answer the hardest questions. Our team collects, processes and analyzes virtually any type of data, including proprietary information, search history, metadata, password-protected files, corrupted files, and deleted files.

Our digital forensics experts work with all manner of digital devices, documenting every step to create a comprehensive report for every investigation.

We offer expert witness and consulting services to corporations and law firms for ongoing data management, setting up technology environments, preparing data for cases, and more.

Types of Data Legility Collects, Processes and Analyzes:

- ✓ Proprietary information
- ✓ Search history
- ✓ Metadata
- ✓ Password-protected files
- ✓ Corrupted files
- ✓ Deleted files

Forensic Consulting

Legility's forensic experts and eDiscovery consultants deliver tailored solutions for all your forensics needs, including:

- Collection & Preservation
- Data exfiltration analysis
- Defensible deletion
- ESI management protocols

Encryption & Password Cracking

Legility's trained engineers use court-validated digital investigation platforms to analyze and decrypt locked or password-protected files on mobile devices, computers, tablets, email programs and more. With distributed processing machines and powerful engines, we can forensically access your data quickly and effectively.

Legility eDiscovery

Make the most of your company's time and resources with Legility eDiscovery. Working from left to right on the Electronic Discovery Reference Model, we support strategic initiatives around information governance as well as tactical requirements for data collection and processing. Our technical offerings can be bundled with our Managed Review services for a comprehensive approach. Or we can partner with the review provided of your choice.
