

Litigation Associates Program

On-demand lawyers. Cost savings.

Legility's Litigation Associates Program provides on-demand lawyers to manage litigation efficiently and cost-effectively.

Companies are increasingly choosing to settle their disputes rather than fight them all the way to trial. They are also disaggregating their litigation work, sending some of the work to third-party outsourcing firms and keeping more work in-house, all in an effort to manage litigation as efficiently and cost-effectively as possible.

Legility offers an innovative program unique in the legal industry to help our clients meet these needs. Our Litigation Associates Program provides on-demand lawyers and legal professionals who do work that has typically been performed by law firm associates at all levels – but they do that work on an interim basis, whether it is short- or long-term, without the overhead costs of full-time staff or a traditional law firm.

The Complexity of the Traditional Litigation Team

Litigation is made up of many different tasks from strategy all the way to keeping a calendar so that deadlines are not missed. Traditionally, all of these tasks were simply farmed out carte blanche to a law firm which gave in-house lawyers little ability to ensure that work was being completed by the most cost-effective firm resource. And this led to high prices and “gotcha” billing moments.

Industry Experience

Our litigation associates have experience ranging in all industries including:

- Financial Services
- Healthcare
- Manufacturing
- Pharmaceutical
- Oil and Gas

Legility's New Law Litigation Team

When handling litigation, today's in house counsel must confront two central questions as they staff the case and justify the resources needed:

"Who can most expediently and efficiently do this work?"

"What is the most cost-effective way to get the task done?"

We unlock potential for our clients by, for the first time, offering experienced in-house and law firm talent on an interim basis. We coordinate closely with in-house and outside counsel to provide resources at any or every phase of a case:

- Initial intake and document holds
- Fact development
- Document collection and employee interviews
- Discovery requests and responses
- Deposition preparation
- Expert discovery assistance
- Trial preparation and second chair duties

Our Litigation Associates Program starts with a custom-tailored process and management workflow based on the litigation staffing needs of any in-house legal department or law firms. With senior lawyers ranging in experience from 10-15 years and junior lawyers ranging in experience from 5-7 years, the litigation team we offer is scalable, versatile and knowledgeable. Most importantly, we offer this talent at rates that allow our clients to meet their budgets, as well as the ability to track and report key metrics, enabling them to make better business decisions.

Let's change the business of legal together.
