

# M3: Multi-Matter Management

A Multi-Matter Management Workflow that Delivers Consistency, Assurance, and Cost Savings

**How often are you faced with having to collect, process and review data more than once across your active matter portfolio?**

For corporate legal departments dealing with serial litigation or ongoing investigations, repeating this process for each subsequent matter is costly and fraught with potential risks. With Multi-Matter Management (M3), you are able to recycle data, metadata, coding, and valuable attorney work product to help you save time, expense, and effort.

## **Automated. Scheduled. Synchronized.**

M3 is a discovery management solution that allows corporations with sizable litigation portfolios and/or frequent inquiries and investigations, to automatically transfer and apply previous attorney work product and virtually any conceivable fielded data across multiple matters in an automated, scheduled and synchronized way. It enables corporations and law firms to look at the bigger picture and develop a repeatable process for assessing and reviewing previously processed and/or reviewed data so it can be seamlessly and proactively transferred, along with its metadata, into an unlimited number of Relativity workspaces. With M3, future matters can make use of previous attorney work product across multiple matters, streamlining future discovery processes and saving you time and expense.

“With M3, future matters can make use of previous attorney work product across multiple matters, streamlining future discovery processes and saving you time and expense.”

## The Old Way

Repetitive Costs Tied to Collecting, Processing & Reviewing Data Across Serial Matters.

## The M3 Way

Leverage Costs and Custodial Data Across Serial Matters.

### With M3 you can:

- ✓ **Reduce Costs**  
 Attorney review costs are significantly reduced by leveraging previous attorney work product across concurrent and future matters (all metadata is consistent).
- ✓ **Reduce Risk**  
 Prior review designations are applied to new matters where documents overlap to keep designations (e.g. privilege) consistent between matters.
- ✓ **Control Process**  
 Enables corporations to maintain control over their data and lighten the management burden of counsel — allowing them to focus on case strategy.
- ✓ **Partner with Proven Discovery Experts**  
 Legility is a leading expert in discovery management. Have the leaders on your side.
- ✓ **Increase Insight into Your Data**  
 From collection, to processing, to production ... gain better visibility into your data and each matter to ensure your overall strategy matches your corporate goals.
- ✓ **Achieve Consistency Across Matters**  
 Metadata transfers so prior designations exist, giving you consistency and reducing risk.

Let's change the business of legal together.
