

Legility Managed Claims Solution

Organizations faced with significant volumes of similar claims often feel significant cost and time pressure. Claims have varying discovery requirements, deadlines, jurisdictions, and local counsel.

Tracking these claims to ensure they are assessed and handled consistently and efficiently, while making information-sharing simple and expedient, can be a significant challenge.

With Legility's managed claims solution, sophisticated legal teams can leverage our managed workflow, process automation, and technical enhancements to provide high quality products in less time than a pure staffing model, at a much lower cost than simply handing the matter to counsel. Legility specialized teams tackle the early claims handling and pull together your matters efficiently at the outset.

The Solution

We combine technology with sophisticated workflows to speed work product creation; deploy quality control measures to provide supervising counsel with high-quality deliverables; and deliver unparalleled transparency into the entire process with detailed monthly reports.

Legility's Services Include:

- ✓ Implementing a cost-effective claims electronic document repository
- ✓ Creation of factual timelines
- ✓ Identification of key witnesses / individuals
- ✓ Draft answers and discovery
- ✓ Abstract claims/case
- ✓ Preparation of factual analysis to support economic experts
- ✓ Providing real time multi-claim data analytics

Achieve the lowest claim handling cost possible with efficient, high-quality legal services:

- Managed Claims Experts, On Demand**
 Legility has a global roster of attorneys and legal professionals and can assemble experienced legal professionals in a matter of days with experience for virtually any type of litigation or claim.
- Purpose-built claims management technology**
- Legility’s Legal Team Manager (LTM)** is a dedicated web-based application that tracks every claim from intake to closure. LTM is specifically tailored for your process to capture the important information about your claims, in precisely the way that’s most effective for your organization.
- Everlaw Claims Repository** provides a central place to:
 - Manage all claims documents
 - Streamline document productions
 - Manage deposition transcripts;
 - Categorize, image, redact, Bates stamp, and produce documents

Legility’s LTM is specifically configured to work in tandem with Everlaw to give you and your counsel full visibility into every matter.

The Results

Regardless of the volume of claims, Legility managed claims solution delivers better claims handling processes; better data management; and enables your team to be well-prepared and well-informed throughout the process.

We’ll help you manage your claims handling process and resources more efficiently, thereby reducing operational challenges and adding earlier predictability of outcome, while saving costs.

Legal Team Manager (DEMO) > Default Dashboard

Legal Team Manager (LTM), is a dedicated web-based application that tracks every claim from intake to closure.

Demo - Claims Workflow Manager (v3) > WO Type Dashboard

Legility’s Claims Workflow Manager is essential in showing who is doing what, the specific work being done, progress and bottlenecks, deadlines and time tracking, and a global view of ongoing claims – all in a simple dashboard. This helps create a “Claims Lifecycle Matrix” from intake to hand-off, with escalation features, a streamlined and repeatable process, and clarity into the status of each claim – available 24/7.
