Legility

eDiscovery Managed Services for Corporations

Drive Cost Predictability into eDiscovery with Legility eDiscovery Managed Services

Get control over your discovery data and legal spend — with eDiscovery managed services, you won't have to rely on multiple law firms, vendors, and third-party tools and technology to keep track of your data.

We provide a customized and flexible discovery management ecosystem with fully integrated best-of-breed technologies and highest levels of data security. Legility eDiscovery managed services delivers everything you need to reliably perform eDiscovery along with the workflow management to make services, software, hardware, and processes work together seamlessly.

eDiscovery Managed Services for Corporations

For corporations, Legility offers the best of both worlds: The control and cost savings of an in-house electronic discovery department; with the speed, efficiency, scalability and quality of a state-of-the-art dedicated eDiscovery company.

Get the support, technology, and capabilities you need across the entire electronic discovery workflow — so you can focus on your key priorities. We understand the realities of managing complex eDiscovery projects, and deliver economies of scale, and importantly — a predictable, monthly cost no matter what your caseload looks like.

Legility eDiscovery Managed Services

With Legility's eDiscovery Managed Services:

- Process and store your eDiscovery data in one place;

- Get predictability over eDiscovery spend;

- Get the scale and capacity to solve any eDiscovery challenge

- No need to invest in hardware or software, or rely on disparate service providers for every matter.

- Minimize operations burden, risk, and overall cost of eDiscovery.

Every eDiscovery managed services partnership with Legility is tailored to the unique needs of your organization, with technology options available to fit your litigation load with the full support of our experts and proven workflows — while eliminating the need to purchase, manage, and maintain hardware and software, or engage with a services provider for every single matter. We work with you to design a managed services package to suit your capacity and workflow requirements at a fixed monthly cost.

Legility's eDiscovery Managed Services Include:

Flexible, Predictable Pricing: We offer predictable and transparent cost models. Metrics are provided monthly and on demand.

Processing: Choose from several processing options – whether you want to process data for your clients or rely on our client service teams.

Hosting: Flexible technology options allow you to be hands-on throughout early case assessment, processing, review, and production with secure data centers around the globe to support data discovery.

Technology-Assisted Review: Legility Envize delivers powerful analytics to help you focus on the critical documents in an eDiscovery review, prioritizing those that are most likely to be responsive, to more efficiently manage review for your clients. Or, you can use Relativity Assisted Review.

Business Intelligence Dashboard: Legility Spotlight is an advanced eDiscovery business intelligence dashboard that delivers real-time insight into data volumes, legal spend, and cost metrics across your entire legal portfolio. With Spotlight's robust reporting capabilities, you can report by case, jurisdiction, matter type, or multiple combinations. You also get reporting on storage, users, custodians and attorney review speed and quality.

Storage Management: From the working files generated during collection, processing, and review to production data sets for opposing counsel, every matter generates data. Managing that data is operational overhead. Legility offers storage and management to meet your projects' demands: the highest-performing drives for active matters, storage used for less frequently accessed data, or archiving designed for offline storage. We work with you to manage, track, protect, and back up your data throughout each project's life cycle.

Chain-of-Custody & Media Tracking: We meticulously track every piece of data that comes in, how it moves through the eDiscovery process, where data copies end up and what happens to the original source files. We take the day-to-day management burden away, while you retain total control and visibility into the process. A detailed chain of custody is always at your fingertips.

Let's change the business of legal together.
