

eDiscovery Managed Services for Law Firms

Drive Cost Predictability into eDiscovery with Legility eDiscovery Managed Services

Minimize operational burden, risk, and overall cost of eDiscovery. We provide a customized and flexible discovery management ecosystem with fully integrated best-of-breed technologies and highest levels of data security.

For law firms, Legility offers the control and cost savings of an in-house electronic discovery department with the speed, efficiency, scalability and quality of a state-of-the-art dedicated eDiscovery company. Legility eDiscovery managed services offers the best of both worlds.

Legility's eDiscovery managed services offers the support, technology, and capabilities you need across the entire eDiscovery workflow — so you can focus on your key priorities. Every dollar you spend on eDiscovery should bring value to your firm — and deliver both economies of scale, as well as competitive differentiation.

Every eDiscovery managed services partnership with Legility is tailored to the unique needs of your firm, with technology options available to fit your matter with the full support of our experts and proven workflows — while eliminating the need to purchase, manage, and maintain hardware and software. We work with you to design a managed services package to suit your capacity and workflow requirements at a fixed monthly cost.

Legility's eDiscovery Managed Services Include:

Flexible, Predictable Pricing:

We offer predictable and transparent cost models. Metrics are provided monthly and on demand.

Processing: Whether you want to process data for your clients or rely on our client service teams to process some or all of your data, we can accommodate your needs.

Hosting: Flexible technology options allow you to be hands-on throughout early case assessment, processing, review, and production with secure data centers around the globe.

Technology-Assisted Review: Legility Enviz delivers powerful analytics to help you focus on the

critical documents in a review, prioritizing those that are most likely to be responsive, to more efficiently manage review for your clients. Or, you can use Relativity Assisted Review.

Business Intelligence

Dashboard: Legility Spotlight is an advanced eDiscovery business intelligence dashboard that delivers real-time insight into data volumes, legal spend, and cost metrics across your entire legal portfolio. With robust reporting capabilities, you can report by case, jurisdiction, matter type, or multiple combinations. You also get reporting on storage, users, custodians and attorney review speed and quality.

Storage Management:

Every matter generates data that must be managed. Legility offers flexible storage and management options: high-performing drives for active matters, storage for less frequently accessed data, or archiving for offline storage. We work with you to manage, track, protect, and back up your data.

Chain-of-Custody & Media

Tracking: We meticulously track every piece of data that comes in. We take the day-to-day management burden away, while you retain total control and visibility into the process, maintaining a detailed chain of custody.

Innovation of our service delivery and business offerings is central to our strategy, and our partnership with Legility creates tremendous value for our clients through a broader geographic reach, expanded technology offerings, and combined support teams.
