

eDiscovery & Managed Review

A Powerful Combination of People, Processes & Platforms

Make the most of your company's time and resources with Legility eDiscovery. Working from left to right on the Electronic Discovery References Model, we support strategic initiatives around information governance as well as tactical requirements for data collection and processing. Our technical offerings can be bundled with our Managed Review services for a comprehensive approach. Or we can partner with the review provider of your choice.

With Legility, you can assign value to every phase of a legal matter and assess and define roles for internal and external partners - ultimately leading to more efficient processes and a stronger return on investment. Our proprietary processes and reporting put you in charge, every step of the way.

Learn more about our solutions:

Data Management. Protect yourself and your company to reduce eDiscovery costs and mitigate legal liabilities. Legility can help you with Information Management policies, litigation holds, recovering lost electronic information and deleting data defensibly.

Data Collection. Legility's certified digital forensic experts ensure that your data is acquired quickly, securely and defensibly. We offer scalable and integrated data acquisition solutions ranging from on-site to remote collection.

Forensics. Our secure Data Solutions Center enables our forensic team to quickly, securely recover and examine electronically stored information. Let us help with forensic analysis, consulting, encryption and password cracking.

Early Case Assessment. Our ECA technology gives you detailed intelligence prior to filtering and review using initial data filtering services and proprietary tools like Legility Intake to reduce and predict costs.

About Legility

Legility is the independent, global new law company.

We're a leader in Legal Operations, providing consulting, technology, managed solutions and flexible legal talent engagement services to corporations and law firms.

Legility has more than 1,000 lawyers, engineers, consultants, technology and data specialists, and operational experts serving one-third of the Fortune 100 and one-quarter of the Am Law 200. Founded in 2000, the company works with clients to improve operational efficiency.

Filtering and Review. Our eDiscovery consultants can customize a data filtering strategy for you that maintains defensibility, streamlines document review and lowers cost. Technology assisted review and predictive coding can be integrated into any of our review options, reducing the number of documents requiring human review.

Managed Review. Work with the highest-quality attorney review for the lowest total cost. We train our teams on multiple platforms and selecting the right tool with you. Managed Review services include:

- Pre-Review Strategy
- Early Case Assessment
- Artificial Intelligence
- Expert Workflow
- Managed Attorney Review
- Proprietary Privilege and Redaction Capability
- Witness and Deposition Prep
- Post-Discovery Support

Support Services. We make sure your eDiscovery needs are handled correctly and efficiently through a variety of services.

- *Cross Matter Management:* We streamline the eDiscovery process to save time and reduce costs by enabling you to reuse work product across multiple matters.
- *Project Management:* Our team creates comprehensive, customized management plans and organized workflows for law firms, corporate counsel and litigation support departments.
- *Production Services:* Legility can fully generate customized eDiscovery productions in any combination of various formats and exports to all accepted media formats.
- *Enterprise Training Solutions:* Keep your data secure, accessible and manageable with a comprehensive evaluation of your environment.
- *Managed Services:* Legility offers the control and cost savings of an in-house electronic discovery department with the speed, efficiency, scalability and quality of a state-of-the-art dedicated eDiscovery company. Powerful in-house eDiscovery technology gives greater control over how data is used and maintained, while sensitive information is protected with enterprise-level, system-wide security.

Litigation Support. Whether you need secure copying, imaging or back file conversion, we have the fastest, most reliable equipment to get the job done right.

Our Approach is Different by Design

Legility creates solutions by combining wide-reaching legal expertise and expert business proficiencies with operational excellence. Let's collaborate to improve your risk profile, better predict and lower costs, track and measure results, and, most importantly, create value for your business.

Let's change the business of legal together.
